Subject: Little Neck - lease

Neal:

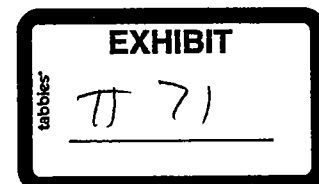

The School Committee's next meeting is Thursday night. An item had been on the agenda regarding the status of the Little Neck construction project and the proposed lease. I have requested that the item be withdrawn and have informed the Committee's counsel that I'm still waiting for written comments from your office (as counsel for "many" of the cottage owners) to the draft which was emailed to you on October 20th.

As my late father, a conductor on the B&M Railroad, would say -- "the train's leaving the station, do you want to get on board or not?"

My clients have been patiently waiting for your comments. It's been a month since the meeting at the VFW and more than three weeks since the meeting with your clients in my office. My clients plan to mail a project update, including a revised project cost breakdown, to the cottage owners in the next week and would like to include a status report for the draft lease.

Any news from your office would be greatly appreciated.
